TECHNICAL SKILLS

Languages: Java, HTML/CSS, JavaScript, Typescript

Frameworks: NextJS, ReactJS, NodeJS, ExpressJS, TailwindCSS

Libraries : Prisma ORM, Mongoose, Zod, React Query

Databases : MongoDB, PostgreSQL

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems

Developer Tools: Git, VS Code, IntelliJ

EXPERIENCE

Web Development Intern

(January 2025 - Present)

Digital Gimmik (Remote)

- Developed a **SaaS** Product which users can use to view and analyze multiple website's Google Search performance in one place.
- Created an Admin panel with customizable plan options, enabling admins to efficiently track user access and manage data for the SaaS Product.
- Technologies used :** TypeScript, Next.js, Prisma ORM, React Query, Node.js, Express.js, PostgreSQL

PROJECTS

Nimbus | *ReactJS, Supabase, Javascript, TailwindCSS, HTML/CSS*

August 2024 – October 2024

- Developed an internal cabin management dashboard for Nimbus cabin chain.
- It manages and updates data from the server efficiently, providing users with quick and responsive interactions, which enhances overall performance.
- Users have the option to toggle between light and dark modes, offering a personalized viewing experience that caters to different lighting preferences.
- The app ensures that only authenticated users can access sensitive areas, protecting user information and maintaining privacy.

WorldWise | *ReactJS, Javascript, HTML/CSS, Zod*

May 2024 – July 2024

- Built with ReactJS, the app allows users to log in and create personalized accounts to securely track their travel history.
- The app helps users keep a detailed record of cities visited, leveraging React's state management to store and display data dynamically.
- Developed with React components, the app ensures a seamless, responsive interface that works across devices.
- Integrated Zod for runtime type checking and data validation, enhancing application reliability.

Fast Pizza | *ReactJS, NodeJS, Javascript, HTML/CSS*

April 2024 – May 2024

- The "Fast React Pizza" project is a web application Built with React, It offers a smooth and interactive interface for browsing pizzas and managing orders.
- Uses React Router to allow users to move between pages like the menu and cart without reloading the page.
- Efficiently fetches and updates data for menus and orders, keeping everything current and responsive.
- Includes error handling to ensure the app runs smoothly and provides clear feedback when issues occur.

EDUCATION

ABES Engineering College (AKTU)

2021 – Present

Bachelor of Technology in Computer Science

CGPA: 7.11

The DPSG International

2018 – 2020

Senior Secondary Education

Percentage: 83.8

ACHIEVEMENTS

Smart India Hackathon

- Got Shortlisted in the Internal Hackathon for SIH.

HackerRank

- 4 Stars in Problem Solving
- 3 Stars in SQL (Intermediate)
